CONTINENTAL HEAT TREATING (Continued) **1006079722**

Site Name:	Continental Heat Treating Inc
Violation Date:	12-15-2008
Citation:	2014-0057-DWQ - Industrial General Permit
Violation Description:	SW - Deficient BMP Implementation
Violation Notes:	190 mg/L of TSS was detected at the sample location, South West, on 12/15/2008.
Violation Division:	Water Boards
Violation Program:	INDSTW
Violation Source:	SMARTS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-15-2013
Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Performed a compliance inspection and observed scrapped metal exposed to precipitation. The facility's SWPPP is missing one Pollution Prevention team member, and the SWPPP is not certified. The facility handles several metals on site and is not testing for metals. The submitted annual reports show benchmark exceedances. Testing of Zn, CU, Iron, and Pb was requested

Longitude:	-118.07321190834
Case Type:	Cleanup Program Site
Case Worker:	DY
Local Agency:	Not reported
RB Case Number:	1057
File Location:	Regional Board
Potential Media Affected:	Indoor Air, Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	The subject site (Site) has been occupied by Continental Heat Treating (CHT) since 1969 to present, processing metal parts. Chlorinated solvents have impacted the subsurface as a result of operations at the Site, including the use of a solvent degreaser. Tetrachloroethene (PCE) and trichloroethene (TCE) have been detected in soil at concentrations of up to 7,514 micrograms per kilogram (ug/Kg) and 4,759 ug/Kg, respectively. PCE was detected in soil gas at a maximum concentration of 41, 300 micrograms per liter (ug/L). Groundwater has also been impacted by releases of chlorinated solvents at the Site.

Agency Contact:	Not reported
Agency Telephone:	Not reported
Agency Type:	Private
SIC Code:	3398
SIC Code 2:	Not reported
Primary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

CONTINENTAL HEAT TREATING CORP (Continued) **1000210689**

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:
Site ID: 375156
CERS ID: 10642375
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 375156
Site Name: Coast Iron and Steel Company
Violation Date: 11-07-2017
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 12/01/2017. I observed 2-55 gallon drums of used oil and 1-55 gallon drum of aerosol cans that were not closed. Provide documentation indicating 2-55 gallon drums of used oil and 1-55 gallon drum of aerosol cans have been closed.
Violation Division: Santa Fe Springs Fire-Rescue
Violation Program: HW

FINDS:

Registry ID: 110002838617

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

OSHA ESTABLISHMENT

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 12/01/2017. I observed 2-55 gallon drums of used oil and 1-55 gallon drum of aerosol cans that were not closed. Provide documentation indicating 2-55 gallon drums of used oil and 1-55 gallon drum of aerosol cans have been closed.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 03/06/1995
Comments: The Department entered into a Preliminary Endangerment Assessment Agreement for the "Jalk Fee Property".

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 06/15/1999
Comments: Completed a Preliminary Assessment for the site. Recommended referral to RWQCB-LA. Preliminary Assessment approved by USEPA. U.S. EPA approved PA which DTSC completed for this site. USEPA determined the site is eligible for an SI.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 12/23/1996
Comments: The PEA Equivalent documented characterization and cleanup conducted between 1991 and 1996. DTSC determined that based on the data presented, "no further action" is required on the "Boneyard" Mobile/Jalk Fee Site, and the hazardous materials remaining do not constitute a threat to human health or the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 10/28/1993
Comments: The Department received a notification from PRP alleged that the site’s soil contamination originated from an off-site source, Continental Heat Treating, Inc.. Soil at the site is contaminated with crude oil; heavy metals such as lead, mercury, and zinc; and chlorinated hydrocarbons such as PCE, TCE, and 1,2-DCE. Sample results indicate that the concentration of these contaminants exceeding regulatory limits. Due to the evidence of contamination onsite, the Department recommends a PEA.

RB Case Number:	0203
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Dichloroethane (DCA), Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History:	The Former ExxonMobil Jalk Fee Property (site) is approximately 9 acres in size and was used for oil production from the 1920s to the 1990s. All oil field facilities were removed in the late 1990s. Initial investigations started in the early 1990s and soil impacted with volatile organic compounds (VOCs) and petroleum hydrocarbons was encountered. In 1998 and 2000, chlorinated and petroleum hydrocarbon impacted soil was excavated at the site and transported to offsite facilities for treatment. In 2001, the Los Angeles Regional Water Quality Control Board (Regional Board) issued a no further action requirement for soil. In 2003, the site was redeveloped as an industrial business park. Initial groundwater investigations started in 2000, with the installation of 3 shallow single-depth groundwater monitoring wells. VOCs, mostly tetrachloroethene (PCE) and trichloroethene (TCE) were detected in groundwater samples. To further assess groundwater conditions at the site, three additional multi-depth wells were installed at the site in April 2011. During this investigation, PCE was detected in soil at concentrations up to 6,600 micrograms per kilogram at approximately 15 feet below ground surface, in the southern part of the site. Groundwater samples from the newly installed wells are impacted with PCE at concentrations up to 1,800 micrograms per liter. Based on these results, the Regional Board is directing the Discharger to conduct additional soil and groundwater investigations; therefore, the 2001 no further action determination for soil is no longer applicable to the site. Additional investigations (soil vapor, soil, groundwater) were conducted in 2012 and 2014. Off-site groundwater investigations were conducted in 2014 with the installation of multidepth groundwater monitoring wells. In 2017, indoor air investigations were conducted at two on-site (10607 Norwalk Boulevard and 10629 Norwalk Boulevard) and one off-site building (10701 Norwalk Boulevard). Indoor air sampling results were used to conduct an evaluation of vapor intrusion into indoor air.

Hazardous Waste Summary:

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

GRAPHIC DIES INC (Continued) **1000347193**

. Waste code: D008
. Waste name: LEAD

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 800

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 28347

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 800

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 28347

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 28347

Violation Status: No violations found

FINDS:

Registry ID: 110000475575

Environmental Interest/Information System

GRAPHIC DIES INC (Continued) **1000347193**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	2698
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	42602
Waste code:	D005

Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	MISCEL
Waste Type2:	Not reported
Waste2:	Miscellaneous (Includes wastes from dewatering, recreational lake overflow, swimming pool wastes, water ride wastewater, ground water seepage and other wastes of this type)
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations:
Site ID: 394011
Site Name: GOODRICH CORPORATION
Violation Date: 08-12-2014
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

CERS Description: Hazardous Waste Onsite Treatment

Violations:
Site ID: 394011
Site Name: GOODRICH CORPORATION
Violation Date: 08-12-2014
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

GOODRICH CORPORATION (Continued) **S113459263**

Citation:	22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Citation:	22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural

GOODRICH CORPORATION (Continued) **S113459263**

integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of

GOODRICH CORPORATION (Continued) **S113459263**

hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Date: 08-12-2014
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external

GOODRICH CORPORATION (Continued) **S113459263**

corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

FINDS:

Registry ID: 110002632296

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

YELLOW FREIGHT SYS (Continued) **U001565079**

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS:

Name:	KO-AM THREADING
Address:	10540 NORWALK BLVD

KO-AM THREADING (Continued) **S113127318**

City,State,Zip: SANTA FE SPRINGS, CA 90670
Site ID: 41995
CERS ID: 10593148
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 41995
Site Name: Ko-Am Threading
Violation Date: 07-07-2017
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 12/21/2017. Owner/operator must store used oil in closed containers. Failure to store used oil in closed containers.
Violation Division: Santa Fe Springs Fire-Rescue
Violation Program: HW
Violation Source: CERS

Site ID: 41995
Site Name: Ko-Am Threading
Violation Date: 07-07-2017
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 12/08/2017. The business failed to review and electronically certify that the business plan is complete and accurate on or before the annual due date. Electronically submit and certify that the business plan is complete and accurate within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the annual due date.
Violation Division: Santa Fe Springs Fire-Rescue
Violation Program: HMRRP
Violation Source: CERS

Site ID: 41995
Site Name: Ko-Am Threading
Violation Date: 10-02-2014
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 11/06/2014.
Violation Division: Santa Fe Springs Fire-Rescue
Violation Program: HW
Violation Source: CERS

Site ID: 41995
Site Name: Ko-Am Threading

KO-AM THREADING (Continued) **S113127318**

Violation Date:	10-02-2014
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain and/or maintain an Active EPA ID.

FINDS:

Registry ID: 110002830946

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110006485543

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

GE CAPITAL COMPUTER LEASING (Continued) **1001075616**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: FORMER POWERINE OIL CO REFINERY - SUBSTATION
Address: 12345 LAKELAND ROAD
City,State,Zip: SANTA FE SPRINGS, CA 90670
Region: STATE
Facility Status: **Open - Site Assessment**
Status Date: 10/01/2015
Global Id: T10000007743
Lead Agency: LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number: Not reported
Latitude: 33.93478
Longitude: -118.0691
Case Type: Cleanup Program Site
Case Worker: EPL
Local Agency: Not reported
RB Case Number: 0318E
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Soil
Potential Contaminants of Concern: Arsenic, Total Petroleum Hydrocarbons (TPH)
Site History: The Site is a Southern California Edison Substation located on the Former Powerine Oil Co Refinery facility. The Substation area was leased by Edison to provide power for the refinery operations. Edison conducted a limited site assessment in its due diligence to return the leased property to the current owner. Levels of Arsenic and TPH were reported above the established cleanup goals for the Former Powerine Refinery facility.

SANTA FE SPRINGS REFINERY (Continued) **S106386988**

Facility Status:	**Open - Remediation**
Status Date:	10/24/2013
Global Id:	T10000005220
Lead Agency:	LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number:	Not reported
Latitude:	33.9331149856774
Longitude:	-118.065839816919
Case Type:	Cleanup Program Site
Case Worker:	EPL
Local Agency:	Not reported
RB Case Number:	0318C
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Arsenic, Benzene, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene
Site History:	Goodman Santa Fe Springs SPE LLC (Goodman) acquired the eastern 36 acres of the property (referred to as the Site) and will conduct investigation and cleanup activities of soil and groundwater at and below the Site. Goodman has entered into an agreement with the Regional Board pursuant to the California Land Reuse and Revitalization Act of 2004 (CLRRA) (Health & Safety Code 25395.60 et seq.), which provides for specified immunities from liability to qualified persons where the person completes investigation and response actions under the oversight of the Regional Board. Pursuant to that agreement, Goodman has agreed to clean up the Site and to pay the Regional Boards oversight costs. The remaining portions of the property and offsite areas affected by the activities of Powerine will be addressed by other parties.

Name:	POWERINE OIL CO
Address:	12345 LAKELAND RD
City,State,Zip:	SANTA FE SPRINGS, CA
Region:	STATE
Facility Status:	**Open - Site Assessment**
Status Date:	05/26/2009
Global Id:	SL372492442
Lead Agency:	LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number:	Not reported
Latitude:	33.9339426600578
Longitude:	-118.068201541901
Case Type:	Cleanup Program Site
Case Worker:	EPL
Local Agency:	Not reported
RB Case Number:	0318A
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Benzene, Crude Oil, Other Petroleum
Site History:	Oil production and refining activities began at the site in the 1930’s and continued until 1995. Assessment of soil and groundwater conditions are ongoing and some above ground structures are being removed to facilitate this. Soil and groundwater are impacted with petroleum hydrocarons and dissolved benzene. The impacted groundwater extends southward, beneath adjacent parcels.

FINDS:

Registry ID: 110002927076

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Longitude:	-118.071522
Case Type:	Cleanup Program Site
Case Worker:	JB
Local Agency:	Not reported
RB Case Number:	0767
File Location:	Regional Board
Potential Media Affected:	Soil, Soil Vapor
Potential Contaminants of Concern:	Benzene, Polynuclear aromatic hydrocarbons (PAHs), Total Petroleum Hydrocarbons (TPH)
Site History:	The Site was owned and operated by Standard Oil Company in the 1920s for oil production operations. There were four oil wells located on the property, identified as Koontz 3, Koontz 5, Koontz 8, and Koontz 10. All four wells were abandoned between 1930 and 1964. Wells identified as Koontz 3, Koontz 8 and Koontz 10 were re-abandoned in 1990 to meet current standards. Aerial photos taken in 1928 and 1938 suggest that unlined pits, located on the property were used to store drilling muds. Two of these areas are in the northwest corner of the property. A third pit is located in the center (north-south direction) of the loading dock. A fourth area of discoloration is located in the southwest corner of the property. In 1964, the first building permit was issued to Shippers Express Company for construction of an office, repair shop building and loading dock. In 1965, a building permit was obtained by Shippers Express to install underground storage tanks. By at least 1986, the Site was occupied by Nielsen Freight Lines. By May 26, 1987, Nielsen Freight Lines was out of business. Yellow Freight Systems (YFS) purchased the property on October 31, 1989 for use as a trucking facility. In 1989, YFS demolished a shop, an office, a fuel island and an acid shed. In addition, five underground storage tanks, a clarifier, and underground piping were removed.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Lead Agency Case Number:	Not reported
Latitude:	33.9324827983943
Longitude:	-118.06708574295
Case Type:	Cleanup Program Site
Case Worker:	EPL
Local Agency:	Not reported
RB Case Number:	1138A
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Benzene, Crude Oil, Other Petroleum
Site History:	Oil production and refining activities began at the site in the 1930's and continued until 1995. Assessment of soil and groundwater conditions are ongoing and some above ground structures are being removed to facilitate this. Soil and groundwater are impacted with petroleum hydrocarbons including free phase hydrocarons and dissolved benzene. The impacted groundwater extends southward, beneath adjacent parcels.

FINDS:

Registry ID: 110002643382

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Completed Document Type: Phase 1
Completed Date: 03/23/1995
Comments: Pursuant to the MOU, DTSC has reviewed a Phase I and a Phase II Environmental Site Assessment and other documents for the Los Angeles Centers for Alcohol and Drug Abuse (LA CADA). The subject property is an existing one-story commerical office building which has been remodeled to accommodate the in and out patient alcohol and drug treatment programs operated by LA CADA. LA CADA is proposing to exercise the purchase option on their present lease. A Supplemental Phase I Environmental Assessment Report was prepared by DTSC and concluded that no action was needed for this property; there is no contamination on the property.

Comments: DEED: A deed restriction was executed for the former Walker Property site. The deed restriction prohibits any disturbance to the asphalt/concrete cap installed in the former Lakewood Section of the property. Also, that portion of the property may not be used for residential purposes. The area meassured 160’ x 100’. O&M: An O&M

WALKER PROPERTIES (Continued) **S101272779**

Plan was implemented for the inspection and maintenance of an asphalt/concrete cap installed on a 1/2 acre portion of site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 07/15/1998
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 02/04/1998
Comments: Approval of Remedial Design document which specifies the installation of a cap on a portion of the site along with a deed restriction.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 06/13/1997
Comments: The Walker Properties site was used by the Getty Oil Company for the handling and storage of hydrocarbon products. Lakewood Oil Service Inc. used the northwestern portion (Parcel 3) to store used crankcase oil and waste diesel fuel in tanks until it could be sold to a recycler. A hydrocarbon liquid was stored on Parcel 2 and is suspected to be JP-5 jet fuel. Parcel 1 has soil conta- minated with petroleum hydrocarbons and some asbestos-containing materials.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 01/09/1996
Comments: A Removal Action was conducted at the Walker Property site on December 5th and 6th, 1995. The soil of the 21 acre site is con- taminated with PCBs, lead, waste oil, and diesel fuel. Weeds had overgrown the site and were causing a fire hazard. A fire on a site contaminated with PCB’s has the potential to release highly toxic dioxins and furans into the atmosphere. The weeds were cut down and removed from the property by a licensed property by a licensed contractor.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 08/11/1994
Comments: The Department provided oversight during the removal of weeds that had overgrown the site which is contaminated with PCB’s, waste oil, diesel and jet fuel, and metals.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 03/22/1994
Comments: The Removal Action (RA) conisisted of removing 100 sq. ft. of friable ACBM and 50 sq. ft. of asbestos contaminated soil sur- rounding the equipment. The ACBM and contaminated soil were transported to an off-site facility.

WALKER PROPERTIES (Continued) **S101272779**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 01/14/1994
Comments: The Removal Action, consisting of the disposal of waste oil and sludge that was contained in storage tanks located on the site, was completed January 7, 1994.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 12/23/1993
Comments: The Department provided oversight of the removal activities at the Walker Properties site. The Removal Action consisted of the removal of 52 overpacked 55 gal drums, 4 closed top bins with contaminated soil, and 1 bin containing crushed drums. The wastes in the overpacked drums and bins were consolidated from over 200 drums in deteriorating condition that were left onsite from previous on site operations and soil and groundwater investigations.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 11/19/1993
Comments: Weeds had overgrown the site and were causing a fire hazard. A fire on a site contaminated with PCB's has the potential to re- lease highly toxic dioxins and furans into the atmosphere. It was also necessary to remove the weeds in order to prepare a new topographical map.

Background Info:	The Walker Properties site was used by Getty Oil Company for the handling and storage of hydrocarbon products, during which time drilling fluids were disposed in onsite sumps. Lakewood Oil Service, Inc. used the northwestern portion of the property to store used crankcase oil and waste diesel fuel in tanks until it could be sold to a recycler. During the past, oil containing polychlorinated biphenyls (PCBs) and lead were disposed of in the area adjacent to Lakewood Oil's tanks. An underground tank was was removed from this area in April 1990. However, soils with extensive PCB and heavy metal contamination remain. A hydrocarbon liquid, suspected to be JP-5 jet fuel, was stored on the southwest corner of the property. Soils in this area contain elevated levels of volatile contaminants. The pathways of concern are inhalation, soil ingestion, dermal contact and groundwater ingestion. The remaining area of the property has soil contaminated with petroleum hydrocarbons and some material containing asbestos. The RI/FS was approved in 1996. Only the PCB contamination in the Lakewood Section presented an unacceptable risk. A RAP approved in 1997 chose capping the PCB area as the remedial alternative. Cap installed. Site certified in 1998There is a deed restriction in place and an operation and maintenance (O & M) for the asphalt/concrete cap. DTSC recovered $11,000 in past costs from BC partners. The site was redeveloped in 2003.

Comments Date:	03221994
Comments:	friable ACBM and 50 sq. ft. of asbestos contaminated soil sur-
Comments Date:	03221994
Comments:	rounding the equipment. The ACBM and contaminated soil were
Comments Date:	03221994
Comments:	transported to an off-site facility.
Comments Date:	04011996
Comments:	Draft Feasibility Study was submitted to DTSC.
Comments Date:	04032002
Comments:	$14,794.10 in past costs plus interest were paid to DTSC by
Comments Date:	04032002
Comments:	the former land owner. All past costs for this site are paid
Comments Date:	04032002
Comments:	in full including interest.
Comments Date:	04301990
Comments:	Removal Action: Underground tank removal.
Comments Date:	06011985
Comments:	Samples taken by Dames & Moore show elevated concentrations
Comments Date:	06011985
Comments:	of lead and barium in the fill material. High concentrations
Comments Date:	06011985
Comments:	of heavy metals and PCBs in north storage area. Explosive
Comments Date:	06011985
Comments:	concentrations of hydrocarbon vapors in vadose zone beneath
Comments Date:	06011985
Comments:	the site.
Comments Date:	06051996
Comments:	DTSC approved the Remedial Investigation/Feasibility study. The
Comments Date:	06051996
Comments:	next step is the preparation of the Remedial Action Plan.
Comments Date:	06131997
Comments:	Not reported
Comments Date:	06131997
Comments:	The Final Remedial Action Plan was approved by DTSC. The RAP in-
Comments Date:	06131997
Comments:	cludes capping the Lakewood Area with an accompanying deed
Comments Date:	06131997
Comments:	restriction.

WALKER PROPERTIES (Continued) **S101272779**

Comments Date:	06131997
Comments:	A RAP proposing the placement of a cap and deed restriction on a
Comments Date:	06131997
Comments:	1/2 acre portion of the property impacted with PCBs was made
Comments Date:	06131997
Comments:	available for public comment on April 23, 1997. The RAP was
Comments Date:	06131997
Comments:	finalized on June 13, 1997 with no changes.
Comments Date:	06131997
Comments:	Not reported
Comments Date:	06131997
Comments:	Action Plan recommended a Negative Declaration for the instal-
Comments Date:	06131997
Comments:	lation of an asphalt cap over a 1/2 acre area. Following the
Comments Date:	06131997
Comments:	public comment period, the Negative Declaration was finalized.
Comments Date:	06281993
Comments:	RI/FS Workplan and Public Participation Plan approved by the
Comments Date:	06281993
Comments:	Department. Implementation of the RI/FS is scheduled to begin
Comments Date:	06281993
Comments:	in July 1993.
Comments Date:	06291992
Comments:	RA F&P Completed. Action consisted of the placement of 1600
Comments Date:	06291992
Comments:	linear feet of fence and one 20 foot wide gate. Weed removal
Comments Date:	06291992
Comments:	to construct fire brakes and the overpacking of 50 drums was
Comments Date:	06291992
Comments:	also completed as part of this action.
Comments Date:	07251991
Comments:	The Walker Properties site was used by the Getty Oil Company for
Comments Date:	07251991
Comments:	the handling and storage of hydrocarbon products. Lakewood Oil
Comments Date:	07251991
Comments:	Service Inc. used the northwestern portion (Parcel 3) to store
Comments Date:	07251991
Comments:	used crankcase oil and waste diesel fuel in tanks until it could
Comments Date:	07251991
Comments:	be sold to a recycler. A hydrocarbon liquid was stored on Parcel
Comments Date:	07251991
Comments:	2 and is suspected to be JP-5 jet fuel. Parcel 1 has soil conta-
Comments Date:	07251991
Comments:	minated with petroleum hydrocarbons and some asbestos-containing
Comments Date:	07251991
Comments:	materials.
Comments Date:	08111994
Comments:	The Department provided oversight during the
Comments Date:	08111994
Comments:	removal of weeds that had overgrown the site
Comments Date:	08111994
Comments:	which is contaminated with PCB's, waste oil,
Comments Date:	08111994
Comments:	diesel and jet fuel, and metals.
Comments Date:	08142002
Comments:	A Consent Order was signed by DTSC and three settling parties to
Comments Date:	08142002

WALKER PROPERTIES (Continued) **S101272779**

Comments:	resolve the settling parties liability concerning hazardous
Comments Date:	08142002
Comments:	substances released at the 10-acre Walker Property Site.

Comments:	storage - 95%. Water settled from drain oil - offsite land dis-
Comments Date:	10271980
Comments:	posal. No problems noted. Open since 1965.
Comments Date:	11011986
Comments:	Samples taken by Dames & Moore show PCB concentrations in soil
Comments Date:	11011986
Comments:	up to 200 ppm, Pb concentrations in soil up to 2470 ppm.
Comments Date:	11142001
Comments:	Annual inspection of cap showed cap in good condition. A few
Comments Date:	11142001
Comments:	weeds observed growing in the edges of the cap will be removed.
Comments Date:	11191993
Comments:	Weeds had overgrown the site and were causing a fire hazard. A
Comments Date:	11191993
Comments:	fire on a site contaminated with PCB's has the potential to re-
Comments Date:	11191993
Comments:	lease highly toxic dioxins and furans into the atmosphere. It
Comments Date:	11191993
Comments:	was also necessary to remove the weeds in order to prepare a new
Comments Date:	11191993
Comments:	topographical map.
Comments Date:	11241998
Comments:	The site was certified after the implementation of the RAP
Comments Date:	11241998
Comments:	(installation of a cap over 1 acre of PCB impacted soil) was
Comments Date:	11241998
Comments:	completed. The remaining 20 acres were evaluated and found
Comments Date:	11241998
Comments:	not to present a threat to human health or the environment.
Comments Date:	12041990
Comments:	PEA report dated July 12, 1990, contains summary of all
Comments Date:	12041990
Comments:	previous sampling. Final recommendation is to clean-up the
Comments Date:	12041990
Comments:	site under DHS supervision. DHS is pursuing a consent order.
Comments Date:	12041990
Comments:	The order will specify the schedule and requirements for
Comments Date:	12041990
Comments:	the Remedial Action Plan (RAP). The site may be split to
Comments Date:	12041990
Comments:	expedite clean-up. Asbestos removal is expected to occur
Comments Date:	12041990
Comments:	shortly after the order is signed.
Comments Date:	12231993
Comments:	The Department provided oversight of the removal activities at
Comments Date:	12231993
Comments:	the Walker Properties site. The Removal Action consisted of the
Comments Date:	12231993
Comments:	removal of 52 overpacked 55 gal drums, 4 closed top bins with
Comments Date:	12231993
Comments:	contaminated soil, and 1 bin containing crushed drums. The
Comments Date:	12231993
Comments:	wastes in the overpacked drums and bins were consolidated from
Comments Date:	12231993
Comments:	over 200 drums in deteriorating condition that were left onsite
Comments Date:	12231993

SHAPCO INC, KELLY PIPE CO DBA (Continued) **1001266794**

Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 03/20/2019. Failure to comply with 23 CCR 2716(a) because DO inspections were one day late in November 2018 and February 2019. Failure to comply with 23 CCR 2716(e) because owner/operator did not sign and date the DO Inspection Report within 48 hours after receiving the report. Owner/operator must ensure DO inspections are conducted every 30 days, and sign the DO Inspection Report within 48 hours after receiving the report.

Citation:	23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 03/20/2019. Failure to comply with 23 CCR 2716(a) because DO inspections were one day late in November 2018 and February 2019. Failure to comply with 23 CCR 2716(e) because owner/operator did not sign and date the DO Inspection Report within 48 hours after receiving the report. Owner/operator must ensure DO inspections are conducted every 30 days, and sign the DO Inspection Report within 48 hours after receiving the report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Workplan
Completed Date: 06/26/2007
Comments: The approved workplan outlines the proposed collection of additional soil, soil gas, and groundwater samples to fill site characterization data gaps identified during an October 4, 2006 meeting and a November 16, 2007 conference call. The tasks included the installation and sampling of multidepth soil gas probes for VOC analysis, soil sampling for VOC's, SVOC's, and metals analysis, and the installation and sampling of groundwater monitoring wells for VOC's and SVOC's analysis.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 02/24/2019
Date Data Arrived at EDR: 02/26/2019
Date Made Active in Reports: 04/17/2019
Number of Days to Update: 50

Source: Drug Enforcement Administration
Telephone: 202-307-1000
Last EDR Contact: 05/24/2019
Next Scheduled EDR Contact: 09/09/2019
Data Release Frequency: No Update Planned

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005
Date Data Arrived at EDR: 08/03/2006
Date Made Active in Reports: 08/24/2006
Number of Days to Update: 21

Source: Department of Toxic Substance Control
Telephone: 916-323-3400
Last EDR Contact: 02/23/2009
Next Scheduled EDR Contact: 05/25/2009
Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 04/29/2019
Date Data Arrived at EDR: 04/30/2019
Date Made Active in Reports: 06/27/2019
Number of Days to Update: 58

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

Telephone: 916-255-6504
Last EDR Contact: 07/08/2019
Next Scheduled EDR Contact: 10/21/2019
Data Release Frequency: Varies

CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 04/09/2019
Date Data Arrived at EDR: 04/11/2019
Date Made Active in Reports: 05/08/2019
Number of Days to Update: 27

Source: CalEPA
Telephone: 916-323-2514
Last EDR Contact: 07/23/2019
Next Scheduled EDR Contact: 11/04/2019
Data Release Frequency: Quarterly

TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995
Date Data Arrived at EDR: 08/30/1995
Date Made Active in Reports: 09/26/1995
Number of Days to Update: 27

Source: State Water Resources Control Board
Telephone: 916-227-4364
Last EDR Contact: 01/26/2009
Next Scheduled EDR Contact: 04/27/2009
Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/24/2019
Date Data Arrived at EDR: 02/26/2019

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

UTM Y (Meters):	3755192.5
Elevation:	132 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5633777 WHITTIER, CA
Version Date:	2012

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

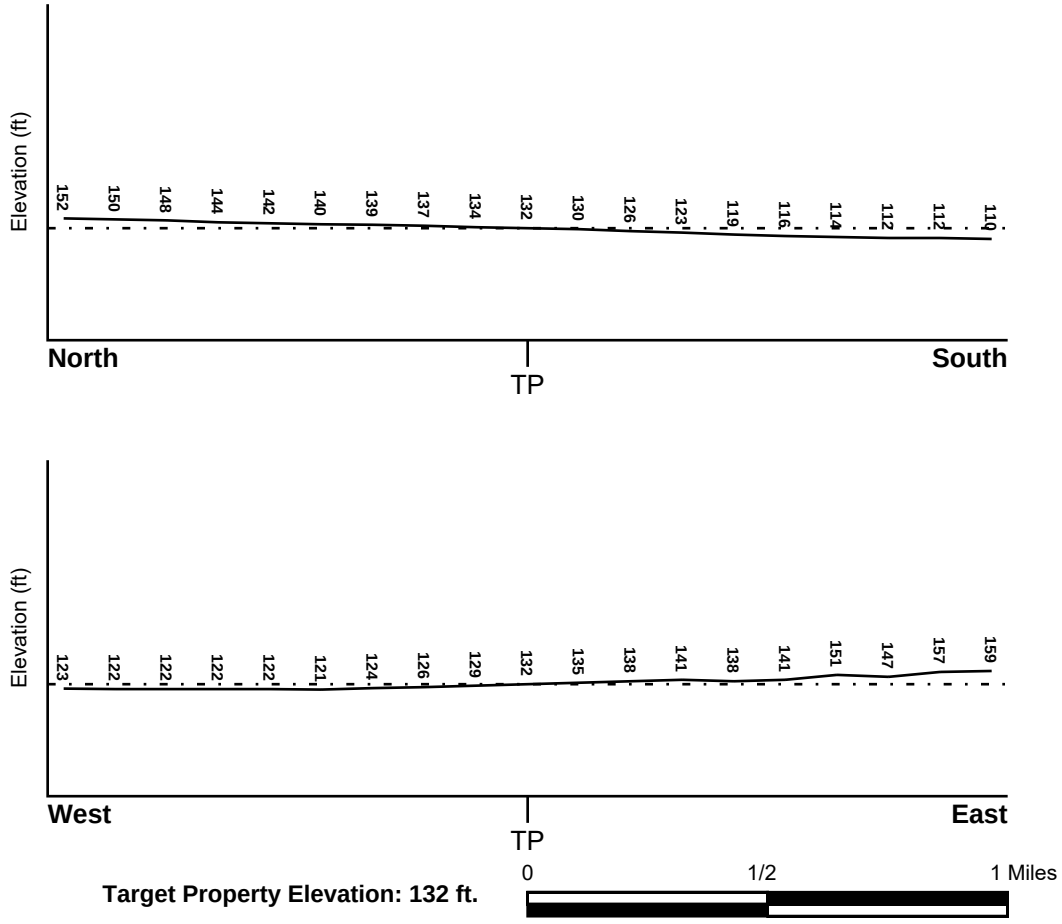
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1837F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1835F	FEMA FIRM Flood data
06037C1829F	FEMA FIRM Flood data
06037C1841F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
WHITTIER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile SE
Site Name:	Powerine Oil Co
Site EPA ID Number:	CAD008383291
Groundwater Flow Direction:	South
Inferred Depth to Water:	70 to 110 feet in the shallow aquifer.
Hydraulic Connection:	The shallow and deeper aquifers are considered to be hydraulically connected in the site vicinity.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/8 - 1/4 Mile East	SSW
1G	1/8 - 1/4 Mile East	SSW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay

sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

CERTIFICATE OF COMPLIANCE

BUSINESS Quality Lift & Equipment, Inc.	SITE ADDRESS 10845 Norwalk Blvd.
INSPECTOR Kevin Yang	DATE OF INSPECTION 6/12/17

This form must be completed and returned to the issuing inspector within 30 days of your facility's inspection unless otherwise noted. Send this form and any supporting documentation to the address listed above. Failure to return this certification may result in a re-inspection of your facility and may require re-inspection fees pursuant to City of Santa Fe Springs Municipal Code Section 97.104.

The violation(s) cited have been corrected by the following actions:

Item #32: This has been corrected and all requested items have now been submitted to CERS.

Item #36: All cylinders are in the process of being secured via our propane supplier. We have a plan in effect to add guards to the large tanks to prevent them to tip over and all small tanks have been secured and/or caged.

Item #6: Our waste oil pickup company "Jack Stone" HAS agreed to work with us on keeping all containers properly labeled and add pickup and Accumulation dates on these labels from this point forward.

- I certify that the violations cited on the Notice of Violation & Inspection Report have been corrected.
- I have personally examined any attached documentation submitted as proof of compliance and I believe the information to be true and accurate.
- Based on my examination of any attached documentation and inquiry of the individual(s) who prepared or obtained them, I believe the information to be true, accurate, and complete.
- I am authorized to file this certification on behalf of the responsible party.
- I am aware that there are significant penalties for submitting false information and/or for non-compliance and declare that the foregoing certification is true and correct.

SENT CERTIFIED MAIL

Attn: John Andrews
Quality Lift & Equipment Inc.
10845 Norwalk Blvd.
Santa Fe Springs, CA 90670

Dear Mr. Andrews:

SUBJECT: FAILURE TO COMPLY WITH VIOLATION

This letter is to inform you that according to our records, Quality Lift & Equipment Inc., remains in violation of the Hazardous Waste Generator, Hazardous Materials Business Plan, and California Fire Code programs. Violations were documented on the Inspection Report and Notice of Violation form dated June 12, 2017. A copy of this report is enclosed for your reference. Compliance with the documented violation was required by July 12, 2017. To date, the Fire Department has not received any response in regard to the correction of the violation.

Failure to return to compliance by October 30, 2017 may result in penalties, fines, or permit revocation as authorized by the City Ordinance, Chapter 97.

Should you have any questions regarding this matter, please contact Kevin Yang, Fire & Environmental Safety Inspector II, at (562) 906-3818. It is essential that this matter be resolved to avoid legal action. We will be happy to assist you in any way possible. Thank you for your cooperation regarding this matter.

Sincerely,

Thomas Hall
Director of Environmental & Fire Prevention

16800 S. Main Street
Gardena, CA 90248-3193

Dear Mr. Rich:

Thank you for meeting with Richard Kallman, Environmental Protection Specialist, on November 3, 1998 at the distribution center located at 10845 Norwalk. As a result of the inspection, the large quantity of propane at the site, and the history of releases at the location, it has been determined that certain upgrades are required. The following is a list of the required upgrades.

1. A gas detection system that alarms a constantly manned central station in the event of a gas release.
2. Fire protection systems that automatically protect the tank in the event of a fire.
3. Crash posts adjacent to Koontz Avenue which will protect the ends of the tanks.
4. The 1,000 gallon tank should be locked out and marked as empty.

The Fire Department is committed to working with you and will assist you in any way possible. Please provide a schedule of how you plan to meet these to Richard Kallman of the Fire Department by December 3, 1998. Should you have any questions, please contact Richard at 562-944-9713.

Sincerely,

NORBERT P. SCHNABEL, FIRE CHIEF

IMPORTANT INFORMATION AND FEE SCHEDULE ON REVERSE SIDE

Investigation
Fire Report No. 69/167
April 4, 1969, 4:48 A. M.
10845 Norwalk Boulevard, Santa Fe Springs, California
Industrial Fuel Corporation

I talked with Mr. Bud Parkhill at 8:00 A. M. on April 4, 1969. He informed me of the accident and stated that an employee of Bucks Petroleum Transport, Gordon Miller had received burns from the fire.

At 9:00 A. M., I went to the scene of the emergency and observed the following: Mr. Bud Parkhill of Industrial Fuel accompanied me. The truck was left just as it was when the accident occured, except Mr. Gordon Miller, the truck driver, had shut down the external, manual valve for the gas line coming from the truck.

Evidently Mr. Miller was in the process of unloading his tank truck. He had just completed his liquid hook up and had started to hook up his gas discharge. On the L.P.G. truck, there is an internal valve and an external valve. Mr. Parkhill stated that the external valve had been left open by accident or had been opened without Mr. Miller's knowledge. When the driver, Mr. Miller, opened the internal valve to create an equal pressure in the short lead of line to the external valve, the gas at about 198 P.S.I. escaped from the external valve. Mr. Miller was standing directly in front of the discharge valve when the gas escaped. Mr. Parkhill informed me that the force of the gas escaping from the line, approximately 1 to 1½ inches in diameter, knocked Mr. Miller down and there was an instant flash fire or explosion. Mr. Miller crawled back to the manual, external valve and closed it and the fire went out. There was no apparent physical damage to the plant or truck other than a hose used for unloading which was charred and the paint in the immediate area was burned.

The cause of the fire or the source of ignition is unknown at this time. Mr.Miller informed Mr. Parkhill that he could not say if the flame started in the front or in the back of him. Unless further information can be obtained, the source of ignition will be listed as unknown.

David Knight
Amerigas
16800 S. Main Street
Gardena, CA 90248

Dear Mr. Knight:

Enclosed is the approved Industrial Waste Discharge Permit No. C-505 for the existing, unused wastewater pretreatment equipment located at:

10845 Norwalk Blvd.
Santa Fe Springs, CA 90670

The existing, unused wastewater pretreatment equipment must be kept dry at all times. Failure to comply with the enclosed special conditions and limitations, or Chapter 97 of the City Code, may result in suspension or revocation of this permit. This permit must remain on the premises at all times.

Amerigas is responsible for preventing any illegal use of the existing equipment. An Environmental Protection Inspector will periodically inspect the facility and equipment to ensure adequate compliance with all requirements. Your full cooperation in preventing pollution is essential to the welfare of the community.

If you have any questions regarding the Industrial Waste Disposal Permit, please call Raul Diaz of this office at (562) 906-3813.

Sincerely,

Raul Diaz
Environmental Protection Inspector

Norman Tucker
Petrolane Gas Service
16800 S. Main Street
Gardena, CA 90246

Dear Mr. Tucker:

Enclosed is Industrial Waste Discharge Permit No. C-253 for your operation located at:

Petrolane Gas Service
10845 Norwalk Blvd.

All industrial wastes shall be disposed of in accordance with this permit, Chapter 18 of the City Code, and the attached special conditions and limitations. This permit must remain on the premises at all times.

Petrolane Gas Service is responsible for maintaining and cleaning the wastewater pretreatment equipment in order to prevent deleterious materials from entering the sewerage system. An Environmental Protection Inspector will periodically inspect the facility and equipment to ensure adequate compliance with all requirements. Your full cooperation in preventing pollution is essential to the welfare of the community.

If you have any questions regarding the Industrial Waste Disposal Permit, please call Tom Hall of this office at 310/944-9713.

CERTIFICATE OF COMPLIANCE

BUSINESS	SITE ADDRESS
INSPECTOR	DATE OF INSPECTION

This form must be completed and returned to the issuing inspector within 30 days of your facility's inspection unless otherwise noted. Send this form and any supporting documentation to the address listed above. Failure to return this certification may result in a re-inspection of your facility and may require re-inspection fees pursuant to City of Santa Fe Springs Municipal Code Section 97.104.

The violation(s) cited have been corrected by the following actions:

(1) Cers Hazardous waste generator forms submitted and approved.
(2) Submitted EPA ID reinststement paperwork. 4/26/2017
(6) Labeled all 55 gal drums on premises.
(12) Scrapped empty 55 gal drums both plastic and steel.

(31) Submitted all hazardous materials through the Cers website.

(33) Industrial waste generated by washpad contained in recycler system. (additional sump addition scheduled for May)

(36) Propane cylinders have been put into cages or strapped together to prevent tipping over.

- I certify that the violations cited on the Notice of Violation & Inspection Report have been corrected.
- I have personally examined any attached documentation submitted as proof of compliance and I believe the information to be true and accurate.
- Based on my examination of any attached documentation and inquiry of the individual(s) who prepared or obtained them, I believe the information to be true, accurate, and complete.
- I am authorized to file this certification on behalf of the responsible party.
- I am aware that there are significant penalties for submitting false information and/or for non-compliance and declare that the foregoing certification is true and correct.

NARRATIVE/COMMENTS: Company services forklifts. Has waste oil, oil filters, rags, battery recycling (exchange), + industrial waste sludge. Rags serviced by AmeriPride in Vernon. Batteries picked up by Exide. Waste oil is reported to be picked up by Asbury but according to Roy Haynes the records are in their Fresno office. Same for oil filters.

By 9/14/02 ① Submit documentation showing legal disposal of waste oil + drained oil filters. ② Provide label for waste oil tank outside. ③ Submit inventory sheet for Formula 50 drum.

Unable to determine compliance with several hazwaste requirements b/c paperwork not being on site. Advised Roy Haynes to submit plans prior to installa-

DEPARTMENT OF FIRE-RESCUE

SENT VIA CERTIFIED MAIL

January 22, 2019

Jose Silverio
Silverio's Party Rental
10801 Norwalk Blvd.
Santa Fe Springs, CA 90670

Dear Mr. Silverio:

SUBJECT: FAILURE TO COMPLY WITH VIOLATIONS AT 10801 NORWALK BLVD.

This notification is provided to inform you that according to our records, Silverio's Party Rental remains in violation of the Hazardous Materials Business Plan, Hazardous Waste Generator, and/or California Fire Code Programs. The violations were documented on the Inspection Report and Notice of Violation form from the December 10, 2018 Department of Fire-Rescue inspection. A copy of this report is enclosed for your reference. Compliance with the documented violations was required by January 11, 2019. To date, Silverio's Party Rental is still not in compliance with all of the items cited.

Failure to return to compliance by March 11, 2019 may result in penalties, fines, and/or permit revocation as authorized by California Health and Safety Code, Section 25404.1.1, the California Fire Code, Section 109.4, and/or the Santa Fe Springs Municipal Code. Your facility can return to compliance by complying with the documented violations, completing the "Certificate of Compliance" certificate provided during the original inspection, and submitting it to the Department at the address listed in the letterhead. A copy of this form has also been enclosed for your convenience.

Should you have any questions regarding this matter, please contact Christa King, Fire & Environmental Inspector II at (562) 906-3817. It is essential that this matter be resolved to avoid legal action. We will be happy to assist you in any way possible. Thank you for your cooperation regarding this matter.

Sincerely,

Thomas Hall
Director of Environmental & Fire Prevention

CERTIFICATE OF COMPLIANCE

BUSINESS Silverio's Party Rent	SITE ADDRESS 10801 Norwalk BL.
INSPECTOR Christa King	DATE OF INSPECTION 12-10-18

This form must be completed and returned to the issuing inspector within 30 days of your facility's inspection unless otherwise noted. Send this form and any supporting documentation to the address listed above. Failure to return this certification may result in a re-inspection of your facility and may require re-inspection fees pursuant to Santa Fe Springs City Code Section 97.300(D) and 97.500(I).

The violation(s) cited have been corrected by the following actions:

- Propane tanks have been secured by a cage and chain. Smoking sign has been Posted 10 Feet away From cage.
- Fire Extinguisher serviced (translated on 1/11/19) due to language barrier
- Extension Cords removed (translated on 1/11/19) due to language barrier
- Needs extension on CERS submittal " " " "

CERS ID # 10778704

- I certify that the violations cited on the Notice of Violation & Inspection Report have been corrected.
- I have personally examined any attached documentation submitted as proof of compliance and I believe the information to be true and accurate.
- Based on my examination of any attached documentation and inquiry of the individual(s) who prepared or obtained them, I believe the information to be true, accurate, and complete.
- I am authorized to file this certification on behalf of the responsible party.
- I am aware that there are significant penalties for submitting false information and/or for non-compliance and declare that the foregoing certification is true and correct.

SECTION 1

Company Name: BROTHERS AUTO WORKS
Site Address: 10801 S. NORWALK BLVD Phone: 310-941-1440
Mailing Address: S. FE SPRINGS CA 90670 Unit #:

SECTION 2

If your business is exempt from the reporting requirements, complete this section.

An exemption is claimed for the following reason (check one).

1) ☐ No hazardous materials are handled.
2) ☐ Hazardous materials handled are less than 500 lbs., 55 gal. or 200 cu. ft. (STP) and Acutely Hazardous Materials (AHMs) are handled in quantities less than the Threshold Planning Quantities specified in 40 C.F.R., § 355, Appendix A.
3) ☐ Hazardous materials are for sale to and use by the general public (contained in packages of 5 gallons or less).

If items 2 or 3 were checked please read the following paragraph.

4) ☐ Please check box 4 if you have already contacted the Fire Prevention Division of the Fire Department to determine if a Uniform Fire Code Permit is required. The Uniform Fire Code requires permits for handling hazardous materials as well as operations which are hazardous in nature. Uniform Fire Code Permits may be required for hazardous materials in quantities less than the above diclosable amounts. Common chemical hazard classes which require a permit include: flammable and combustible materials, cryogens, compressed gases, oxidizers, water reactive and unstable materials, carcinogens, toxic and highly toxic materials, explosives, irritants, corrosive and radioactive materials, etc.

SECTION 3

If your business is not exempt, complete this section.

Mr. Richard Hayes
Hathaway Properties, Inc.
P.O. Box 1099
Kihei, HI 96753

SUBJECT: UNDERGROUND STORAGE TANKS REMOVAL REPORT – TEXACO SERVICE STATION, 10801 NORWALK BOULEVARD, SANTA FE SPRINGS, CA 90670

Dear Mr. Hayes:

The Santa Fe Springs Fire Department (SFSFD) has reviewed the additional information from your consultant Cal-Vac Environmental Services, dated January 6, 1999. This additional information, assuming that it is accurate and representative of actual site conditions, supports the sampling data as plausible, and satisfies the requirements stated in our letter to you of November 30, 1998. The SFSFD has no further information needs at this time.

However, pursuant to changes in the California Health and Safety Code (AB 681), the SFSFD requires Hathaway Properties, Inc. as the current primary or active responsible party, to submit to the SFSFD a complete list of names and addresses of all current record owners of fee title (List) at this site before any corrective action of site closure can be considered. Hathaway Properties, Inc. is required to certify to the SFSFD in writing that this list is current, active, and complete. The SFSFD is required to notify these current owners of fee title of any proposed corrective action or site closure, and give them reasonable opportunity to participate in the site cleanup of closure process. The SFSFD is also required to consider all input and recommendations from responsible participating landowners.

The SFSFD would appreciate your submittal of the List by March 15, 1999.

If you have any questions, please contact Steve Chase of this agency at (562) 944-9713.

Sincerely,

NORBERT P, SCHNABEL, FIRE CHIEF

David R. Klunk,
Director of Environmental Protection

COUSINS CARPET, INC.
10801 NORWALK BLVD
SANTA FE SPRINGS, CA 90670-3825

NOTICE TO PERMITTEE: You are required to obey all Federal and State laws that regulate or control your business. This permit does not allow you to do otherwise.

IS HEREBY AUTHORIZED PURSUANT TO **SALES AND USE TAX LAW** TO ENGAGE IN THE BUSINESS OF SELLING TANGIBLE PERSONAL PROPERTY AT THE ABOVE LOCATION.
THIS PERMIT IS VALID ONLY AT THE ABOVE ADDRESS.

THIS PERMIT IS VALID UNTIL REVOKED OR CANCELED AND IS NOT TRANSFERABLE. IF YOU SELL YOUR BUSINESS OR DROP OUT OF A PARTNERSHIP, NOTIFY US OR YOU COULD BE RESPONSIBLE FOR SALES AND USE TAXES OWED BY THE NEW OPERATOR OF THE BUSINESS.

Not valid at any other address

For general tax questions, please call our Information Center at 800-400-7115.
For information on your rights, contact the Taxpayers' Rights Advocate Office at 888-324-2798 or 916-324-2798.

BOE-442-R REV. 15 (2-06)

A MESSAGE TO OUR NEW PERMIT HOLDER

As a seller, you have rights and responsibilities under the Sales and Use Tax Law. In order to assist you in your endeavor and to better understand the law, we offer the following sources of help:

- Visiting our website at *www.boe.ca.gov*
- Visiting a district office
- Attending a Basic Sales and Use Tax Law class offered at one of our district offices
- Sending your questions in writing to any one of our offices
- Calling our toll-free Information Center at 800-400-7115

As a seller, you have the right to issue resale certificates for merchandise that you intend to resell. Conversely, you have the responsibility of not misusing resale certificates. While the sales tax is imposed upon the retailer,

- You have the right to seek reimbursement of the tax from your customer
- You are responsible for filing and paying your sales and use tax returns timely
- You have the right to be treated in a fair and equitable manner by the employees of the Board
- You are responsible for following the regulations set forth by the Board

As a seller, you are expected to maintain the normal books and records of a prudent businessperson. You are required to maintain these books and records for no less than four years, and make them available for inspection by a Board representative when requested. You are also expected to notify us if you are buying, selling, adding a location, or discontinuing your business, adding or dropping a partner, officer, or member, or when you are moving any or all of your business locations. If it becomes necessary to surrender this permit, you should only do so by mailing it to a Board office, or giving it to a Board representative.

If you would like to know more about your rights as a taxpayer, or if you are unable to resolve an issue with the Board, please contact the Taxpayers' Rights Advocate Office for help by calling toll-free, 888-324-2798 or 916-324-2798. Their fax number is 916-323-3319.

Please post this permit at the address for which it was issued and at a location visible to your customers.

SUBJECT: RESULTS OF SOIL VAPOR SURVEY FOR METHANE CONCENTRATIONS IN THE SUBSURFACE MEDIA AT 10801 S. NORWALK BOULEVARD, SANTA FE SPRINGS, CALIFORNIA

To whom it may concern:

This letter report presents the results of the soil vapor investigation conducted by Optimal Technology (Optimal) on behalf of Environmental Managers & Auditors, Inc. (EMA) on April 26, 2004. The study was performed at 10801 Norwalk Blvd., Santa Fe Springs, California.

Optimal was contracted to perform a soil vapor survey at this site to screen for possible Methane. The primary objective of this soil vapor investigation was to determine if soil vapor contains methane in the subsurface soil.

Sampling Method

Sampling was performed by hydraulically pushing 1/2" galvanized steel soil gas probes to a depth of 5.0 feet bgs. An electric rotary hammer drill was used to drill a 1.0 inch hole through the overlying concrete/asphalt to allow probe placement when required. The same electric hammer drill was used to push probes in areas of resistance during placement.

At each sampling location an electric vacuum pump (set to draw 2 liters/min of soil vapor at a maximum vacuum of 100" of water) was attached to the probe and purged prior to sample collection. Vapor samples were obtained in Hamilton gas-tight syringes by puncturing silicone tubing which connects the sampling probe and the vacuum pump. New silicone tubing was used at each sampling point to prevent cross contamination. Samples were immediately injected into the gas chromatograph after collection. New sampling probes were used after each sample with positive results. Equipment blanks using ambient air were collected throughout the day. If

significant contamination is detected in these blanks, corrective actions would be taken to identify and eliminate the source, if possible.

All analyses were performed on a laboratory grade Hewlett Packard model 5890 Series II gas chromatograph equipped with a Flame Ionization Detector (FID) and an Electron Capture Detector (ECD). Restec wide bore capillary columns using hydrogen as the carrier gases were used to perform all analysis. All results were collected on a personal computer utilizing Hewlett Packard's PC based chromatographic data collection and handling system.

Quality Assurance

3-Point Calibration

An initial 3-point calibration was performed on April 26, 2004 by preparing a calibration solution from a pre-mixed standard supplied by Supelco, Inc.

The initial three point calibrations consisted of 20, 100 and 500 ul injections of the calibration solution. A calibration factor on each analyte was generated using a best fit line method using the HP data system. If the r^2 factor generated from this line was not greater than 0.990, an additional three point calibration would have been performed. Method detection limits were calculated to be 1.0 ug/L for the individual compounds.

Sample Replicates

A replicate analysis (duplicate) is run when concentrations exceed the calibrated range of the instrument/detector being used. The duplicate sample is diluted using a smaller injection volume to assure that the instrument response falls within 50% of the calibrated range. In addition, a duplicate analysis is run a minimum of once each day to evaluate the reproducibility of the sampling system and instrument. If the difference between samples varies more than 20%, the entire system is evaluated and the inconsistency is determined and corrected, if possible.

Equipment Blanks

Blanks are run at the beginning of each workday, after calibrations and whenever sampling conditions appear to change. New vapor probes are used following each sample with positive results or when probes were damaged during installation. The blanks are collected using an ambient air sample. These blanks checked the septum, syringe, GC column, GC detector and the ambient air. Contamination was not found in any of the blanks analyzed during this investigation. Blank results are given along with the sample results.

Subsurface Conditions

Subsurface soil conditions at this site were predominantly silty-sand from ground surface to 5.0-ft. bgs. These soil conditions offered good sampling flows at 2.0 liters/min and 0" water vacuum. Depth to groundwater was unknown at the time of the investigation.

Scope of Work

To achieve the objective of this investigation a total of 3 vapor samples were collected from 3 locations throughout the site. Sampling depths, vacuum readings, purge volume and sampling volumes are given on the analytical results page. All the collected vapor samples were analyzed on-site using Optimal's mobile laboratory.

Results

During this vapor investigation, methane was not detected above the listed detection limit. A complete table of analytical results is included with this report.

Disclaimer

All conclusions presented in this letter are based solely on the information collected by the soil vapor survey conducted by Optimal Technology. Soil vapor testing is only a subsurface screening tool and does not represent actual contaminant concentrations in either the soil and/or groundwater.

We enjoyed working with you on this project and look forward to future projects. If you have any questions please contact me at (818) 704-4404.

Sincerely,

ENVIRONMENTAL MANAGERS & AUDITORS, INC.

The following information is required before a new business inspection can take place. Inspections are performed by the Fire Department. Deviation from this statement may affect your occupancy classification and could require building and/or fire protection upgrades. You must notify the City's Building and Fire Departments before making any changes in use/occupancy.

Business

CHECK THE APPROPRIATE BOXES BELOW	YES	NO
1. Will you be storing or warehousing a product or commodity in an area exceeding 500 sq. ft.? If so, complete items A & B below.		/
A. Rack storage over 12 feet in height?		/
B. Plastics, rubber goods, tires, flammable liquids, idle pallets over 6 feet in height?		/
2. Will you be cooking food commercially?		/
3. Will you have compressed gases?		/
4. Will there be any LPG storage outside the building?		/
5. Will you be using industrial baking or drying ovens?		/
6. Will you be welding or cutting, using flame producing devices?		/
7. Will you be installing any spray booths or is there an existing spray booth in this building?		/
8. Will you be repairing any vehicles inside the building?		/
9. Will assemblies in excess of 49 persons take place on your premises (conference rooms, lunchrooms, restaurants, etc.)?		/
10. Will you be doing any operations that produce explosive or flammable DUST (woodworking, sanding/grinding of any wood material, metal polishing, etc.)?		/
11. Will you be applying flammable and/or combustible finishes?		/
12. Will you be using and/or installing any dip tanks?		/

CHECK THE APPROPRIATE BOXES BELOW	YES	NO
13. Will there be any LPG stored or used inside the building other than tanks on forklifts?		/
14. Will you handle, use, or store any hazardous materials in tanks, drums, containers or any closed or open system?		/
15. Will you have explosives, blasting agents or radioactives?		/
16. Are the quantities of hazardous materials handled greater than 499 lbs., 54 gal., 199 cu. ft. or over the Threshold Planning Quantity for materials regulated by CalARP?		/
17. Are there or will there be any active or inactive, or closed underground storage tanks on the property?		/
18. Does your site have any visible or below ground contamination from past or present chemical use?		/
19. Will you generate, store, transport, or treat any hazardous waste (used oil, spent parts cleaner solution, waste anti-freeze, waste ink, waste paint thinner, metal sludge, etc.)?		/
20. Will you generate and/or discharge any wastewater (non-domestic) to the sewer system?		/
21. Does your facility's SIC code fall within the industrial or commercial category for the storm water program? Refer to storm water fact sheet.		/

Business Description: USED TRUCK SALES
(NO TRUCK SERVICE OR REPAIR ON-SITE).

CERTIFICATE OF COMPLIANCE

BUSINESS WEST COAST ENTERPRISES	SITE ADDRESS 10845 NORWALK BLVD, SFS
INSPECTOR RICHARD	DATE OF INSPECTION 7/31/12

This form must be completed and returned to the issuing inspector within 30 days of your facility's inspection unless otherwise noted. Send this form and any supporting documentation to the address listed above. Failure to return this certification may result in a re-inspection of your facility and may require re-inspection fees pursuant to City of Santa Fe Springs Municipal Code Section 97.104.

The violation(s) cited have been corrected by the following actions:

1. ENCON TANKS REMOVED TANKS & labeled WATER CONTAINER

2 FIRE EXTINGUISHER SERVICED IN GARAGE

- I certify that the violations cited on the Notice of Violation & Inspection Report have been corrected.
- I have personally examined any attached documentation submitted as proof of compliance and I believe the information to be true and accurate.
- Based on my examination of any attached documentation and inquiry of the individual(s) who prepared or obtained them, I believe the information to be true, accurate, and complete.
- I am authorized to file this certification on behalf of the responsible party.

I am aware that there are significant penalties for submitting false information and/or for non-compliance and declare that the foregoing certification is true and correct.

Notes: On 7/10/17 Roufs Machine Company was inspected. Company repairs machine parts. Generates very low volume of waste oil. Shares property with Lenpar.

Item #2, Company's EPA ID Number, CAL000298256, is inactive. Owner/operator must maintain an active EPA ID.

Item #31, Company is storing propane, welding gases, and waste oil in quantities above exempt amounts. Owner/operator must obtain a Hazardous Materials permit and complete a Hazardous Materials Business Plan through CERS.

Item #37, Fire extinguishers were serviced more tha a year ago. Owner/operator must maintain fire extinguishers every 12 months.

* All violations corrected - 3/13/18 KY

No hazardous waste violation(s) observed on date of inspection

Notice to Comply: The violation(s) must be corrected by 8/10/17

Return attached "Certificate of Compliance"

Attention: The item(s) checked is (are) in violation. All violations must be corrected. A re-inspection may occur at any time to verify compliance. Non-compliance will result in re-inspection fees, permit revocation, and/or administrative/civil/criminal penalties. Any time granted for correction of the violation(s) does not preclude enforcement action by this Department or other agencies. The giving of this notice and recent inspection of your facility is not a representation by the City of Santa Fe Springs that no other violations exist on your premises.
